

# Queensland Blue Couch

- ✎ **Excellent Colour**
- ✎ **Excellent Texture and density**
- ✎ **Strong Wear & Tear**
- ✎ **Drought Tolerant**
- ✎ **Shade Intolerant**

## Suggested Sowing Rate

**It is recommended at a minimum to sow new lawns at 1-2kg per 100sqm. Apply a starter fertiliser and watering regime at recommended rates.**

Queensland Blue Couch (*Digitaria Didactyla*) is an excellent choice to produce soft, fine leaf grass lawn which as its name suggests has a blue-green tinge. It is ideal for tropical and sub-tropical areas, where it grows well on a wide range of neutral to acidic soils.

A grass suited to temperate Australian climates, it is tolerant of very acidic soils (PH 5.5 and lower) and is a very dominant grass when compared to other warm season varieties, particularly under low fertility conditions. It does not favour shaded areas, instead performing well in drought impacted areas, recovering well after a sustained natural rainfall event.
